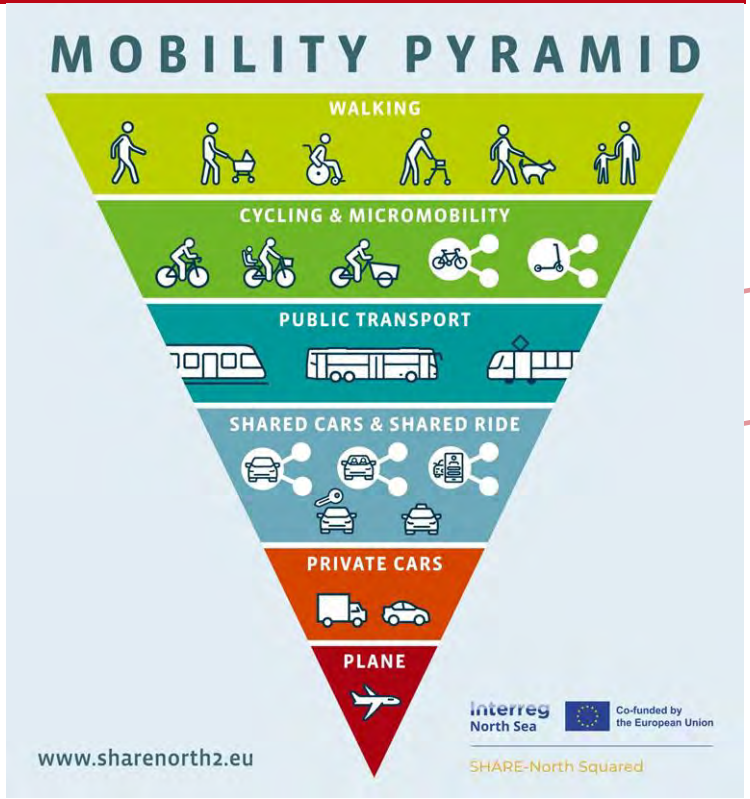
Mobility priorities

From strategy to infrastructure

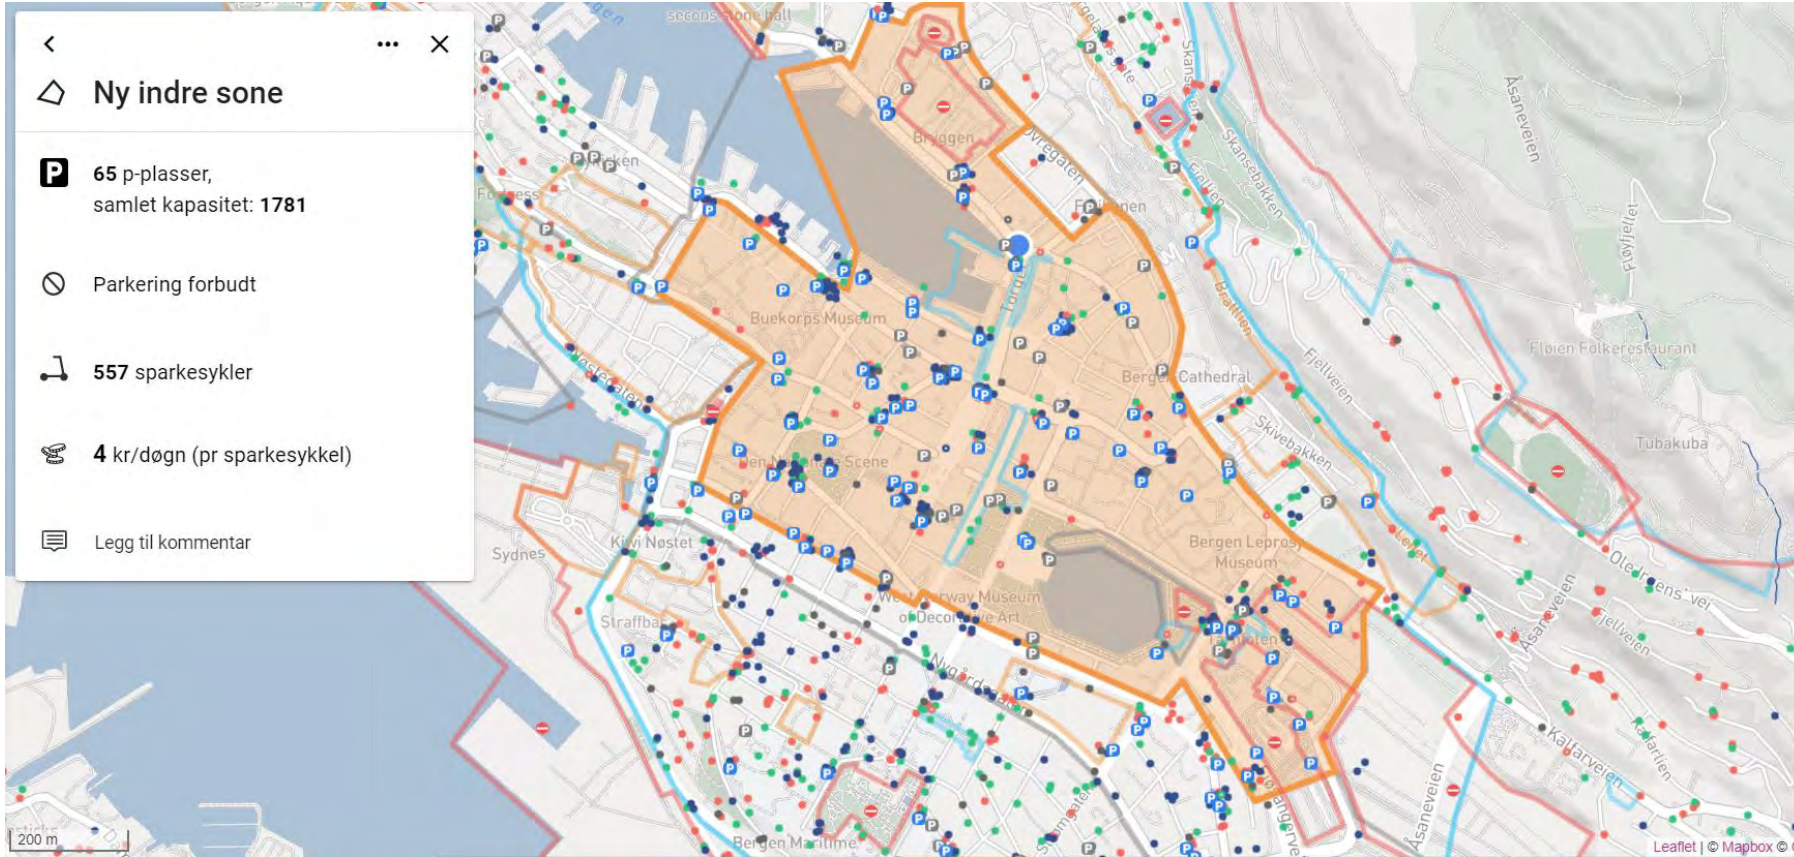


BERGEN KOMMUNE

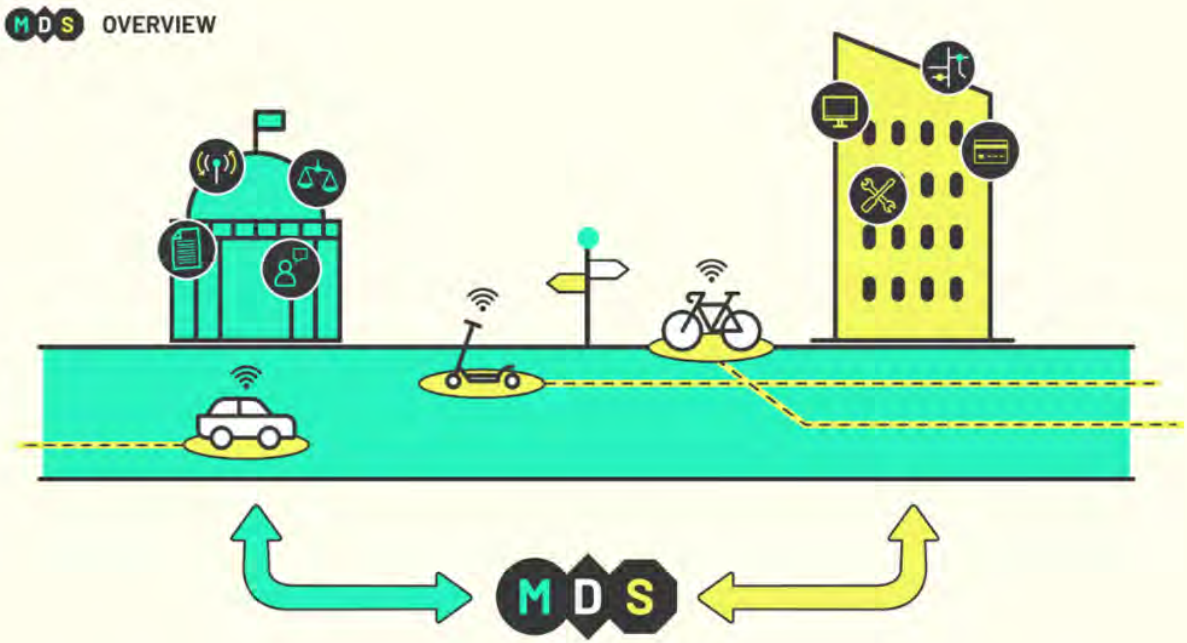
Micromobility challenge and the Bergen regulation pilot

- To provide safety, clear passage and tidyness in city streets and public space
- To learn more about whether and how micromobility can contribute to a sustainable transport system by developing and testing a new digital regulation tool

Regulation for the connected vehicles of the future



Open data standards for mobility



CITIES

Manages the street and right of way. Responsible for policy, equity, resident feedback and issues, and MDS Agency.

MDS

The digital infrastructure that lets cities and companies share information and manage devices together.

COMPANIES

Manages devices. Responsible for maintenance and repairs, billing, remote monitoring, and MDS Provider.
