

# Global Marketplace

Virtual | 10-12 October 2023

Co-hosted by

*Decarbonizing your neighborhoods*

CASCAIS

*October 10th 2023*

+ Climate resilient communities embrace an innovative approach for a holistic urban change by **“inviting nature back into the city”** and grasping **low carbon urban planning**

+ Our **“Decarbonization living labs”** aim to drive a new threshold on sustainable lifestyle and economy

+ We have prioritized innovative sustainable urban planning and design, including resilient pathways and **cross cutting issues**

+ Our Decarbonization Living labs explore new solutions on multi-sector scale. Including **local renewable energy production within energy communities**

+ We co-create! We need solutions to accelerate the uptake of local energy production:

- Regulatory framework
- Citizen driven apps
- Energy gamification
- Public tender models
- Success stories

+ We aim to **empower** ourselves and other cities to take action!

*Thank you*
